

Oakland Mills Cluster Redistricting Alternative Scenario

Objectives:

- Maintain the Oakland Mills Village community by keeping the Thunder Hill neighborhood in Oakland Mills High School
- Maintain Oakland Mills Middle to Oakland Mills High feeder path
- Avoid increasing the rate of students receiving FARMS at Oakland Mills High as it is already the highest in the county
- Balance socioeconomic, racial, and ethnic diversity between Talbott Springs Elementary and Stevens Forest Elementary
- Similar or decreased busing through Oakland Mills Village

Proposal:

High School

Polygons 151 (28 students), 1151 (52 students), 2111 (16 students), and 111 (23 students) to Oakland Mills High. This represents the Thunder Hill neighborhood and small adjoining areas that attend Oakland Mills Middle School (also include 2151 and 1111 polygons for continuity, but these have no students).

Polygons 1030, 1032, 2030 (total 85 students) split between Atholton High and Hammond High (or possibly all can go to one of these schools). Note that polygons 1045 and 45 along MD-175 are commercial areas with no students. These polygons connect to 1030, 1032, and 2030 to avoid an island, but, in reality, serve no students.

Objectives met: Maintain Oakland Mills Village, maintain feeder path, maintain FARMS rate.

Elementary School

Polygon 1110 (63 students) to Stevens Forest Elementary.

Polygons 3059 (32 students), 55 (15 students), 59 (33 students) to Talbott Springs Elementary

Polygons 1059 (22 students) and 2059 (14 students) to Stevens Forest Elementary (as currently planned in feasibility study)

Objectives met: Balance socioeconomic, racial, ethnic diversity; steady or decreased busing through Oakland Mills; maintains Oakland Mills Middle to Oakland Mills High feeder path.

Note: Planning documents indicate that the new Talbott Springs Elementary School will have a capacity of about 500 students in 2020. This plan would bring TSES to 109% in 2018, but this does not include 11 portable classrooms available and would be permanently alleviated with completion of the new school.
